Passion-driven, tech agnostic developer, powered by the command line

## Experience

### Software Craftsperson, Incubyte

Jun 2021 – Present, Remote

Working in a **Full-Stack** role with a focus on Ruby on Rails, with a US-based client in the mental health space, emphasizing on software quality and client satisfaction.

- Led and implemented various requirements on a **Ruby on Rails + Next JS** application, taking end-to-end ownership of features.
- Developed robust tooling and processes for i18n and l10n bringing down the required time to introduce new language/region from months to days.
- Configured large-scale CI/CD workflows with **GitHub Actions** and **Circle CI**, greatly improving developer productivity and software quality.
- Added a11y features including screen reader, readability, contrast, navigation, etc, allowing wider range of users access to the app.
- Built personal rapport and trust with the client, prioritizing product goals and business requirements, receiving multiple shoutouts.
- Helped with multiple initiatives related to hiring, open source, blogging, and building internal processes.

### Project Engineer, Wipro

Sep 2020 – Jun 2021, Bengaluru, KN, India

Worked on enhancement of a legacy codebase with a Latin American client in the consumer products sector.

- Developed new logic for critical business modules with support for foreign currencies in a legacy **Java Swing** codebase.
- Integrated **SAP Crystal** into the invoicing process, migrating away from a custom legacy system.
- Handled multiple deployments to QA and Production, automated it with **Python** and **Bash**
- Served as a translator helping with requirement gathering between the client and the team (English <-> Spanish).

### Mentor, Mentors Without Borders

March 2020 - Present, Remote

Volunteering as a mentor, helping people worldwide to learn more about technology.

- Taught students programming and web development along with various tools and technologies.
- Raise awareness among students about the importance of clean code and open source software.
- Guide students in getting into tech careers and be excited about learning.

### SDE Intern, Edifixio

Dec 2018 - Jan 2019, Kolkata, WB, India

- Built an Android app for IoT device data monitoring with Bluetooth Low Energy.
- Deployed live app using AWS Lambda and received appreciation from users.

## Education

### Bachelor of Technology, BIET (MAKAUT)

Computer Science and Engineering, 2016 - 2020, 8.37/10

- Spent most of my time self-learning, contributing to open-source and learning new technologies.

## Skills

- **Programming Languages:** Ruby, Java, Python, Ruby, JavaScript, Bash, Lua, PHP
- **Frameworks/Libraries:** Ruby on Rails, React, NextJS, Hugo, Spring, NodeJS, Laravel
- **Data:** GraphQL, ActiveRecord, SQLAlchemy, JDBC, RDBMS, NoSQL, Redis, Pandas, Numpy
- **DevOps:** GitHub, Circle CI, Azure, AWS, Heroku, Aptible, Docker
- **Testing:** JUnit, Jest, Enzyme, Rspec, PyTest, Cypress, Pact
- **Spoken Languages:** English, Hindi, Bengali, Spanish
